Professional Summary

- Backend Developer with 1 year of experience in developing robust and scalable web applications using the MEAN stack (MongoDB, Express.js, Angular, Node.js).
 - Proficient in designing and implementing RESTful APIs, authentication, and authorization mechanisms with roles and policies.
 - Knowledgeable in Low-Level Design (LLD) and High-Level Design (HLD) principles, adhering to KISS, DRY, and SOLID principles for clean and maintainable code.
 - Certified in MEAN Stack and DevOps, with a strong foundation in modern development practices and deployment pipelines.
-

Professional Experience

Durapid Technology

MEAN Stack Developer

Mar 2021 – 2022 Year

- Developed and maintained scalable backend systems using Node.js, Express.js, and MongoDB, MySQL, Sequelize ensuring high performance and reliability.
 - Designed and implemented RESTful APIs for seamless communication between frontend (Angular) and backend services.
 - Integrated authentication and authorization mechanisms, including role-based access control (RBAC) and policy-driven security.
 - Collaborated with cross-functional teams to gather requirements, perform LLD and HLD, and deliver features adhering to KISS, DRY, and SOLID principles.
 - Utilized DevOps practices to streamline CI/CD pipelines, improving deployment efficiency and reducing downtime.
 - Optimized database queries and indexing in MongoDB to enhance application performance.
-

Education

Master of Computer Applications (MCA)

2021 – 2024

- Specialized in software development and modern web technologies.

Bachelor of Computer Applications (BCA)

2018 – 2021

- Built a strong foundation in programming, databases, and system design.
-

Certifications

- **MEAN Stack Certification**
 - Demonstrated proficiency in MongoDB, Express.js, Angular, and Node.js for full-stack development.
 - **DevOps Certification**
 - Skilled in CI/CD pipelines, containerization, and deployment automation.
-

Technical Skills

- **Languages/Frameworks:** JavaScript, TypeScript, Node.js, Express.js, Angular
 - **Databases:** MongoDB
 - **Tools/Technologies:** RESTful APIs, JWT, OAuth, Git, Docker, Jenkins
 - **Design Principles:** KISS, DRY, SOLID
 - **System Design:** Low-Level Design (LLD), High-Level Design (HLD)
 - **Other:** Authentication/Authorization (Role-Based, Policies), API Development, DevOps Practices
-

Key Projects

E-Commerce Platform (Durapid Technology)

- Developed a full-stack e-commerce application using the MEAN stack, enabling secure user authentication and role-based access for customers and admins.
- Designed RESTful APIs for product management, cart functionality, and order processing.
- Implemented MongoDB schema with indexing to optimize query performance.
- Applied KISS and DRY principles to ensure clean and maintainable code.

Task Management System

- Built a task management application with role-based authorization, allowing admins to assign tasks and users to manage their tasks.
 - Integrated JWT-based authentication for secure user sessions.
 - Utilized Angular for a responsive frontend and Node.js/Express.js for backend logic.
 - Deployed the application using Docker and CI/CD pipelines for seamless updates.
-

Soft Skills

- Strong problem-solving and analytical skills.
- Effective team collaboration and communication.
- Adaptable to fast-paced and dynamic work environments.
